

LED SKY
CEILINGS

The logo for LED SKY CEILINGS features a stylized blue cloud with a sunburst above it. Below the cloud, the words "LED SKY" are written in a bold, blue, sans-serif font, and "CEILINGS" is written in a smaller, blue, sans-serif font on a blue rectangular background.

**Light
is life**

LED SKY CEILINGS was founded in the domain of healthcare, and in response to the question if it would be possible to think of a visually attractive solution as an alternative for the dull white ceilings patients are always staring up at.

That is why we have been supplying the most beautiful cloud ceilings on the European and UK market. Crystal-clear image in an ultra-thin LED panel, for a competitive price. With our cloud ceilings, we add an extra experience to every room.

Daylight

By stimulating daylight with the right LED panels and the use of realistic high-resolution pictures, you will really feel like you are working outside when you are actually inside, or feel like you are being treated under a blue sky.

The colour temperature of our light matches daylight. This makes it seem like you are actually looking outside through a very real window, and visitors and employees also experience the positive effects of daylight when they are inside.

5 REASONS TO CHOOSE A LED SKY CEILING

- A positive distraction during treatment, meeting or visit.
- More energy for you, your colleagues and your visitors.
- The sense of outdoors alleviates anxiety and stress.
- A visit to your institution or company will be a more positive experience.
- A visual wow-factor within your company or institution.

Standard

Applied in corporate, recreational and medical spaces: our standard product is the ideal solution for a realistic cloud ceiling with daylight experience for a very reasonable price.

With the standard formats 60×60, 120×60 and 120×120, the ultra-thin LED-panels are very easy to implement in the suspended ceiling. The LED SKY CEILING standard cloud ceiling can be executed with a picture of your own or one of our crystal-clear pictures.

A panel lifter ensures that the picture is a few centimetres higher than the existing ceiling, making it look like a realistic roof window.

Standard dimensions

By default, our panels are available in the suspended ceiling dimensions 60×60, 60×120 and 120×120 cm.

Photography

You can choose between our crystal-clear pictures, online image databases or submit your own design. Our designers can always create the desired effect.

LED SKY CEILING lifter

By default, our panels are equipped with a lifter, which provides the desired roof window effect.

Glossy or anti-reflective

With us you can choose whether you want the panels glossy or anti-reflective.

Dimmable

All of our panels are dimmable by default. We would love to hear from you which way you would prefer this to work. For example, think of 0-10V, DALI and by remote control.

Simple installation

Our Standard panels are made for the suspended ceiling and provide a 'Plug and Play' solution for the light. This makes it possible for our panels to be installed within one lunch break.

Plus

Are you looking for a unique cloud ceiling with a deviating dimension, a different colour profile or a special request for its finish? With our Plus products we deliver customisation, we would love to think along with you based on our experience with over 1,500 projects.

We produce our panels in the Netherlands and have access to the most modern equipment, so the possibilities are endless. Let yourself be inspired by the most common adjustments below or contact us to discuss the possibilities.

Different led

By default, all of our panels are made with Daylight LED, but the possibilities are endless.

Other colour profile?

By default, our products are equipped with a white filter. If you would like a different colour, that is no problem at all.

Extra lighting

Some situations require more light, which is no problem with our Plus panels.

Deviating dimensions

Aside from our standard dimensions, we can also make panels in any dimensions you choose.

Customization

LED SKY CEILINGS makes the panels in the Netherlands, so customization is no problem at all.

No suspended ceiling

If you have no suspended ceiling, there are various possibilities.

LED SKY CEILING Photo Art

Empty walls and areas with little or no natural light are now just a wonderful opportunity with LED Sky Ceilings' Photo Art.

We have developed this range to complement the LED Sky Ceiling range as a means of bringing daylight and the great outdoors to space with no natural light.

By default, our Photo Art comes in a modern white frame and fits in every room, enabling our customers to choose almost any image. Whether it is a picture from our database, an image from www.shutterstock.com or perhaps a photo from a client, anything is possible.

With the capability to make any size up to 3m x 1.2m, we have the correct scale and image for every hospital ward, office space or home.

Why not bring a space to life with LED Sky Ceiling Photo Art!
