

KWICKSCREEN

KIN

An unobtrusive fixed-to-wall screen, the KwickScreen Kin makes a sleek addition to the built environment.

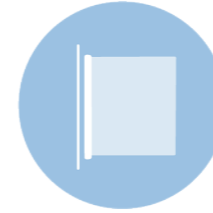

As a light screen with a super-stable base, the Kin is easy to pull out as and when you need it. It ensures you retain the flexibility of your space and retracts neatly against the wall when not in use

The Kin is designed to provide privacy around an area the size of a recliner or an incubator. With its compact 2m screen, it's perfect for smaller spaces where a full-size screen would be too obtrusive

A flat, stable base, meaning it's a minimal trip hazard with enhanced stability.

FEATURES

Fixed to Wall

Perfect for in between bed spaces or spaces requiring non-portable privacy.

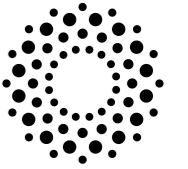

180° Range

180° range of movement from the fixed wall bracket. Unobtrusive and fits against the wall easily.

Customisable

Choose from our extensive image catalogue for a print that suits your space.
